

# KubeJS Powah

Download: [Curseforge](#) [Modrinth](#)

Allows you to create Energizing Orb recipes from the [Powah](#) mod.

Example:

```
ServerEvents.recipes(event => {
    // .energizing([inputs, ...], output, energy)
    event.recipes.powah.energizing(["minecraft:cobblestone", "minecraft:tnt", 1000)
})

PowahEvents.registerCoolants(event => {
    // .addFluid(fluid, coolness)
    event.addFluid("minecraft:lava", 10);

    // .addSolid(fluid, coolness)
    event.addSolid("minecraft:cobblestone", 10);
})

PowahEvents.registerHeatSource(event => {
    // .add(block, hotness)
    event.add("minecraft:cobblestone", 10);
})

PowahEvents.registerMagmaticFluid(event => {
    // .add(fluid, hotness)
    event.add("minecraft:water", 10);
})
```
